

Hello,

My name is Brandon Brower and am a loyal XM Subscriber. Apparently this is an issue that should not be of focus for the FCC. I pay \$9.99 a month for the services they provide. Not only am I paying for quality, but too for the content. I cannot say I use the Weather and Traffic on a regular basis, but when I do, it helps me out a lot and helps me plan my day and week. I am sending this on my own behalf, with the help of XM. Please reject NAB's petition 04-160, as it does not violate any regulations. NAB should not have the power to dictate what I hear on a service I pay for and for that, is the reason I am sending this petition. Please respect my right, and the rights of millions of other XM listeners, by showing the NAB they cannot control what listeners pay for. On a side note, this is a free market..shouldn't NAB compete for my business rather than turning to the FCC for help?!!

Thanks,
Brandon Brower
